

About our team:

TheHackersCrew is a multinational cybersecurity team with members from all around the world, spanning 15+ countries across 6 continents. Together, we have actively competed in weekly CTF competitions for nearly two years.

We are currently ranked 1st in the world this season on CTFtime - <https://ctftime.org/stats/>.

In 2022, we

- Ranked 13th overall on CTFtime
- Won 1st in 5 CTFs
- Won 2nd in 12 CTFs
- Won 3rd in 3 CTFs
- Placed top 5 in 26 CTFs
- Placed top 10 in 39 CTFs
- Hosted BSides Ahmedabad CTF 2022 and CrewCTF 2022

In 2021, we ranked 24th overall, won 1st in 8 CTFs, 2nd in 3 CTFs, and 3rd in 3 CTFs.

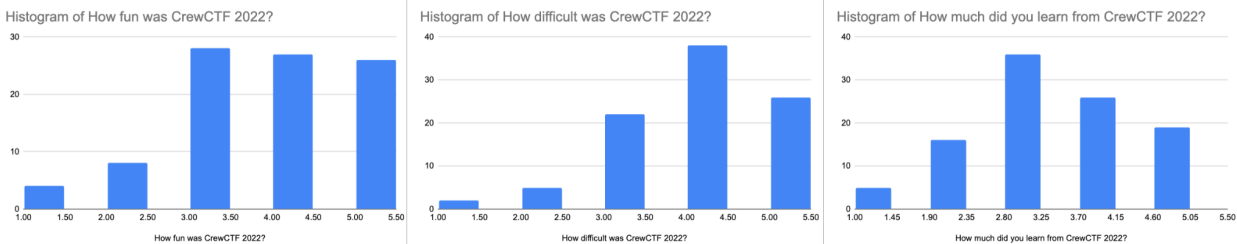

About our competitions:

We have been working hard over the last few months on **CrewCTF 2023**, which will start at 17:00 UTC on April 28th and run for 48 hours, ending at 17:00 UTC on April 30th. We are holding a Jeopardy-style event with around 6 challenges in each of the following categories: Cryptography, Forensics, Reverse Engineering, Binary Exploitation (commonly known as Pwn), Web (and Web3) Exploitation, and Miscellaneous

CrewCTF is an annual cybersecurity competition that brings together teams from around the world to compete for prizes and bragging rights. Our team greatly values diversity and inclusivity, making it our mission to make it free and open to anyone with an internet connection.

With beginner to expert-level challenges, our contests are also great opportunities for students and professionals to pick up, practice, and master new skills in cybersecurity. Challenge containerization provides safe, hands-on environments for all contestants.

We held our first edition last year in April 2022. Our CTF website had over 10,000 unique visitors from all around the world with over 1500 registered accounts forming 889 teams. Our competition infrastructure was stable for the entire 48 hours with the ability to handle much more traffic. We received great feedback that the challenges were enjoyable, though on the harder side. Most participants learned something as well.

We would like to extend a major thank you to Google Cloud Platform, Trail of Bits, SSD Secure Disclosure, Burp Bounty, and Give My Certificate for sponsoring CrewCTF 2022!

We also had the opportunity to collaborate with Security BSides to host an in-person CTF at BSides Ahmedabad in October 2022 for 280+ participants / 160+ teams. This went smoothly and we received positive feedback from our competitors.

This year, we are looking forward to a CrewCTF, with a wider range of difficulties, higher quality challenges, more competitors from around the world, and more sponsors!

We are looking for companies who would like to sponsor and support our event, whether monetary or in-kind. We are also open to collaborating with you to host any sponsored challenges.

As a sponsor, your company would be prominently featured in all promotional materials, such as flyers and social media posts, and on the front page of the competition.

You can reach our team at thehackerscrew@protonmail.com to discuss the details further. We look forward to hearing from you soon!
